

**Professor Lars Melholt Rasmussen**, Professor in Clinical Biochemistry, Odense University Hospital, Odense, Denmark

Lars Melholt Rasmussen is professor in clinical biochemistry in Odense, Denmark. His research has mostly focused on diabetic arterial disease, particular description of the molecular pathology and pathophysiological mechanisms. During recent years prof. Rasmussens research group has worked with proteomic characterization of human arterial tissue not only in relation to diabetes, but also studying associations between vascular protein alterations and cardiovascular risk factors and several vascular conditions.
